EXPOS

Print4All 2025 dates announced

The countdown has started and in two years the world of printing will gather once again at Fiera Milano for Print4All, scheduled from 27 to 30 May 2025.

Organised by Fiera Milano and promoted by Argi and Acimga - the two leading Italian associations in the printing and converting sector - Print4All reconfirms its identity as an integrated platform for the printing world and its professionals. The 2025 edition will focus on the opportunities offered by the increasing convergence between printing technologies and target markets to lend a voice to all components of integrated solutions capable of meeting any customer requirements. The exhibition will offer the best of printing, converting and finishing innovation for all industry areas, from graphics to sales, from packaging to industrial.

The road towards the 2025 edition starts with the Print4All Conference 2023, a key event to exchange communications and information organised by Acimga and Argi, in collaboration with Fiera Milano being held on 6 July at Stresa.

The expo will be held with the theme 'Convergence, Experience and Networking'.

Convergence between the various printing applications, which intersect to create new solutions and new business opportunities, but also convergence between technologies and new techniques.

Experience because, in particular through the exhibition and themed areas dedicated to particular market segments, it will be possible not only to approach new topics, but also to discuss the major challenges of the industry, especially how to be sustainable and efficient in terms of production processes and market offerings.

Finally, Networking, because the trade fair is an opportunity for business, but also for meeting and comparing with synergistic sectors, which is guaranteed both by the format of Print4all, which welcomes the entire supply chain (manufacturers, printers, communication agencies/designers, brands) at once, and by the renewed membership of The Innovation Alliance, which sees Print4All, Ipack-Ima, Green Plast and Intralogistica Italia, four trade fairs that all represent the excellence of instrumental mechanics, taking place simultaneously.
